

Pear Shaped Face

Pear face

A pear-shaped face is narrow at the temples and forehead and wider at the cheeks and jawline.

Tip:

Remember that the proper hairstyle can go a long way in balancing any face shape. In this case, bangs and hair brushed over the temples add fullness to the upper half of the face.

IF YOU HAVE A PEAR FACE:

- Highlight your forehead to create the illusion of width, and highlight underneath the eyes on top of the cheekbones and the tip of your chin.
- Contour the jaw line and the cheeks to minimize their width.
