

Long Face

Long face

A long face has high cheekbones, a high, deep forehead, and a strong, sharp, chiseled jaw line.

Tip:
When applying your blush, start closer in on the apples of your cheeks and brush outward across the face.

IF YOU HAVE A LONG FACE:

- Never highlight or contour your face. This will only make your face appear even longer.
- Brush a bit of bronzer across your chin to help shorten its length.
- Be generous with your blush and place a lot of color on the apples of your cheeks. This will help wide and shorten your face.
- Bangs can help shorten the length of your face as well.
